UPPER MCALPINE CREEK SANITARY SEWER PROJECT

- ABOUT THE PROJECT -

Charlotte Water will be working to install a new sanitary sewer pipe along a tributary of McAlpine Creek between Lawyers Road and Albemarle Road to accommodate growing wastewater needs in the area. This new pipe will provide increased wastewater service capacity for future development within the McAlpine Creek Basin and adjacent Clear Creek Basin areas.

Over the past two years, our Project Team has performed surveying, field studies, testing and recently finalized permits and easement acquisitions. The project is moving into construction, which is anticipated to conclude early 2023.
