WHAT: Charlotte Water is planning to install a new wastewater pipe to serve neighborhoods along Upper Taggart Creek between Morris Field Drive and Carlyle Drive.

Attend a virtual public meeting on May 12th at 12:00 pm. Log in at charlottewater.org > Projects > Construction > Upper Taggart Creek Wastewater Project. The presentation will be recorded and posted on the webpage.

WHEN: Construction is estimated to start mid-May 2020 near Morris Field Drive. Construction is estimated to be complete by Spring 2022.

WHERE: Installation of the new pipe will occur in construction easements starting near Morris Field Drive.

WHAT TO EXPECT:
Clearing - CLTWater removes trees, shrubs, bushes, and other vegetation inside the construction easement before installing the wastewater pipe. When and where possible, trees on the edge of the temporary construction easement are preserved. Clearing is estimated to take at least six weeks.

Pipe delivery and storage – Pipes, large manholes, and other materials are delivered and stored within the construction easements and road right-of-ways.

Establishing a safe work zone – Fencing will be put in place and pipe will be stabilized to prevent it from moving.

Trench digging will be more than twenty-feet deep.

Customers may feel a rumble
- Crews may remove rock formations by use of small blasting.
- Areas along the alignment where blasting is required will be determined shortly after site clearing.
- Residents within a 500 foot radius of the blasting sites will be contacted in advance.
- Blasting is a standard construction procedure and all safety precautions will be taken.
- Residents may hear a warning horn and feel a slight vibration or rumble similar to a slammed door or thunder.

Construction traffic (excavators, dump trucks) will be along the creek, within the easements or road right-of-way. Roads will be open during the project.
