

# 6<sup>th</sup> and Graham

storm drainage improvement project

YOUR STORM WATER FEES AT WORK

Dear Resident,

Charlotte-Mecklenburg Storm Water Services and consulting engineer HDR continue to move forward with the planning phase of the 6th and Graham Storm Drainage Improvement Project. The goals of this project are to improve the storm drainage infrastructure and to reduce flooding of streets and structures.

For more information about this project, please visit our website at: <http://stormwater.charmeck.org> Click on **Storm Water Projects** dropdown menu in the green bar, then **Active Projects** and **6th and Graham**.

If you have questions, please contact Project Manager Greg Cole at 704-336-4824 or [gcole@charlottenc.gov](mailto:gcole@charlottenc.gov).

During the Planning Phase, HDR analyzes the storm drainage system within the neighborhood to determine how well it is working and to locate any problems and/or concerns. HDR is now analyzing several possible alternatives to determine the best solution.

February 2014

## Shade Your Stream

Property along creeks and lakes should be planted with native trees and shrubs.

**ROOTS**

Roots anchor the soil, reduce flood damage and take up excess fertilizers.

**COOL TEMPERATURES**

Shade keeps the water cool, allowing fish and aquatic life to thrive.

**WILDLIFE HABITAT**

Shaded streams provide valuable habitat for wildlife.

For more information about stream buffers, visit <http://stormwater.charmeck.org>
