

# 6th and Graham

## Storm Drainage Improvement Project

## Project Status

September 2021

Charlotte-Mecklenburg Storm Water Services and engineering consultant HDR continue with the design phase. Norfolk Southern Railroad is currently reviewing the proposed storm drainage system plans in the area of the 6th Street rail line overpass near Elmwood Cemetery. The railroad review has required changes to the project design due to the structural impacts to the existing overpass. Once the design plans are approved by the railroad, a public meeting will be held, and the easement acquisition process will begin.

The 6th and Church Streets repair project is completing utility relocations. Once the relocations are complete, the bid phase will begin. During this phase, the final plans will be circulated to qualified contractors for a competitive bidding process.
