

Alanhurst/Cherrycrest

storm drainage improvement project

YOUR STORM WATER FEES AT WORK

July 2012

Dear Resident,

The Alanhurst-Cherrycrest Storm Drainage Improvement Project continues to progress through the planning phase. WK Dickson is currently improving the models by updating the accuracy of the data based upon the feedback and information provided by the residents at the public meeting held March 1. Storm Water Services will take this updated information to review different alternatives to address the drainage issues and concerns in the neighborhood.

For more information about this project please visit our website at <http://stormwater.charmeck.org> and click on **Storm Water Projects** drop down menu in the green bar, then **Active Projects and Alanhurst/Cherrycrest**.

If you have any questions, please contact Project Manager Susan Tolan at stolan@charlottenc.gov or 704-432-0407.

CHARLOTTE

Engineering & Property Management
Storm Water Services Division
600 East Fourth Street
Charlotte, North Carolina 28202

Did you know?

- The top two pollutants in Charlotte creeks are sediment and bacteria.
- The best way to control erosion is to plant something. Nothing holds soil in place better than plant roots.
- Soil testing in North Carolina is free. Take the guesswork out of fertilizer and lime purchases.
- Charlotte receives more rain than Seattle.
- Creeks start in Charlotte and flow downstream out of the County.
