

# Bonwood Drive

Storm Drainage Improvement Project

November 2018

## **Project Status**

Charlotte-Mecklenburg Storm Water Services has hired consultant Armstrong Glen, P. C. and their surveyor Survey and Mapping Control, Inc. to study possible improvements to the storm drainage system in the Bonwood Drive project area. Representatives may need to enter your property to collect survey data on the existing storm drainage system. While state law authorizes this access to private property, no building or structures will be entered or disturbed. The survey work is scheduled to begin in December and will take approximately two weeks to complete.

## Investing in Infrastructure

Storm Water Services designs and constructs projects that make a difference in the lives of residents across the city. Our community benefits when stormwater quickly drains off roads, flood risks to homes are reduced and the health of local streams is protected or improved.

The Bonwood Project goal is to reduce flooding of streets and structures throughout the neighborhood.
