

# Bonwood Drive

Storm Drainage Improvement Project

September 2019

## *Project Status*

Charlotte-Mecklenburg Storm Water Services and engineering consultant Armstrong Glen, P.C. are working to complete the planning phase. The project team has analyzed the existing drainage system and is developing several alternative solutions. A public meeting will be held once the project team is ready to present the recommended design.

The project team is aware of a sinkhole, caused by a broken stormwater pipe, in a yard along Bonwood Drive. Residents should expect to see staff making a temporary repair in this area over the coming weeks.

## Investing in Infrastructure

Storm Water Services designs and constructs projects that make a difference in the lives of residents across the city. Our community benefits when stormwater quickly drains off roads, flood risks to homes are reduced and the health of local streams is protected or improved.

The Bonwood Project goal is to reduce street and structure flooding throughout the neighborhood.
