

# Cedars East

## Storm Drainage Improvement Project

January 2018

### **Project Status**

Charlotte-Mecklenburg Storm Water Services and engineering consultant, STV Engineers, Inc., have acquired all easements and environmental permits needed for construction. Stakeholders have approved the design plans and the bid phase is next.

### **Next Steps**

During the bid phase, the final plans will be circulated to qualified contractors for a competitive bidding process. The bid phase typically lasts six to seven months. Once City Council awards the contract, construction will begin. In the meantime, relocations will be performed by various utility owners near the Amity Place culvert to prepare for work to begin at that location. The project area is located between the Arcadian Village Apartments (formerly Idlewild Apartments) at the intersection of Idlewild Drive and Cedars East Court, just east of Independence Boulevard and the culvert under Amity Place.

## Investing in Infrastructure

Storm Water Services designs and constructs projects that make a difference in the lives of residents across the city. Our community benefits when stormwater quickly drains off roads, flood risks to homes are reduced and the health of local streams is protected or improved.

The Cedars East Project goal is to reduce street and structure flooding throughout the neighborhood.
