

Cedars East

storm drainage improvement project

YOUR STORM WATER FEES AT WORK

July 2012

Dear Resident:

Charlotte-Mecklenburg Storm Water Services and engineering consultant, STV/Ralph Whitehead Associates, are progressing with the planning phase of the Cedars East Storm Drainage Improvement Project. The project area is located between the Arcadian Village Apartments (formerly Idlewild Apartments) at the intersection of Idlewild Drive and Cedars East Court, just east of Independence Boulevard and the culvert under Amity Place.

For more information about this project, please visit our website at <http://stormwater.charmeck.org> and click on **Storm Water Projects** drop down menu in the green bar, then **Active Projects** and **Cedars East**.

If you have any questions about this project, please contact Project Manager Matthew Anderson at 704-336-7923 or manderson@charlottenc.gov.

An alternate has been selected to address the flooding issues in the watershed. We will share the results with the neighborhood for feedback once that alternate is studied.

Did you know?

- The top two pollutants in Charlotte creeks are sediment and bacteria.
- The best way to control erosion is to plant something. Nothing holds soil in place better than plant roots.
- Soil testing in North Carolina is free. Take the guesswork out of fertilizer and lime purchases.
- Charlotte receives more rain than Seattle.
- Creeks start in Charlotte and flow downstream out of the County.
