

CHANDWORTH

Storm Drainage Improvement Project

February 2019

Project Status

Charlotte-Mecklenburg Storm Water Services and Real Estate consultant Telics have acquired most of the easements needed for construction. The project team continues to work on the design plans and acquire the required environmental permits.

Next Steps

During the bid phase, the final plans will be circulated to qualified contractors for a competitive bidding process. The bid phase typically lasts seven to eight months. Once City Council awards the contract, construction will begin.

Investing in Infrastructure

Storm Water Services designs and constructs projects that make a difference in the lives of residents across the city. Our community benefits when stormwater quickly drains off roads, flood risks to homes are reduced and the health of local streams is protected or improved.

The Chandworth Project goals are to replace failing infrastructure plus reduce street and structure flooding throughout the neighborhood.
