

# Chandworth

## Storm Drainage Improvement Project

January 2018

### *Project Status*

As the project continues we are progressing to the real estate phase. The project team is currently developing easement maps. The survey will also be updated in some areas as a result of significant change in property ownership and new area features such as garages, additions, landscaping, etc. A licensed surveyor may use drone aircraft to expedite the survey/mapping work in the project area to photograph and map the project area.

## Investing in Infrastructure

Storm Water Services designs and constructs projects that make a difference in the lives of residents across the city. Our community benefits when stormwater quickly drains off roads, flood risks to homes are reduced and the health of local streams is protected or improved.

The Chandworth Project goals are to reduce street and structure flooding throughout the neighborhood.
