

Edgewater/Rosecrest

storm drainage improvement project

your storm water fees at work

July 2013

Dear Resident,

Charlotte-Mecklenburg Storm Water Services and US Infrastructure of Carolinas (USI) continue to work through the planning phase of the Edgewater/Rosecrest Storm Drainage Improvement Project. USI is preparing the Alternatives Analysis Report. Once complete, City staff can compare the different means of addressing the stormwater drainage issues in the neighborhood. A public meeting will be scheduled to present the recommended alternative and solicit comments from the residents. Meeting details will be mailed to residents two weeks prior to the meeting.

The project goals are to update the existing infrastructure,

reduce the flooding in structures and streets, increase channel capacity and reduce erosion.

For more information, please visit our website at <http://stormwater.charmeck.org> and click on **Storm Water Projects** drop down menu in the green bar, then **Active Projects** and **Edgewater/Rosecrest**.

If you have any questions about this project, please contact Project Manager Greg Cole at 704-336-4824 or gcole@charlottenc.gov.

When you clean your car, don't forget this detail:

Soap will clean your car, but it won't clean our streams.

Don't wash your car on your driveway or in the street. Soap suds flow to the nearest storm drain, then directly into the nearest creek. That could kill fish and other aquatic life.

Instead, park your car on your lawn to wash it. Or, better yet, take your car to a professional car wash where the water is cleaned. You'll have a clean car and all of us will have clean streams.
