Storm Drainage Improvement Project

Storm drainage repair on Myers Park Drive

Project Status

May 2020

Charlotte-Mecklenburg Storm Water Services and engineering consultant W.K. Dickson have completed the design phase. The final plans were circulated to qualified contractors in April.

There is currently a storm drainage repair at Myers Park Drive. This repair includes replacing an inlet and a 72-inch pipe on Hanson Drive as well as rehabilitating the storm drainage system at the intersection of Hanson Drive and Hampton Avenue.

Next steps

Once City Council awards the contract, property owners will be notified of the construction schedule. Construction activities will begin with locating, flagging and marking utilities.
