

Public Meeting Minutes

Hampton Storm Drainage Improvement Project

November 20, 2018

Charlotte-Mecklenburg Storm Water Services held a public meeting on November 1 at Christ Episcopal Church to present the proposed improvements and begin the easement acquisition phase.

Meeting highlights

- Danee McGee introduced the project team and explained the easement acquisition process.
- A question/answer session was held, as well as breakout sessions to review the design plans.

Resident concerns

- *Effects of road closures* - Access to some driveways will be affected temporarily and road closures will be phased.
- *Muddy streets during construction* - The project must meet erosion control permitting guidelines to be cleaned.
- *Repaving* - Hampton Avenue will be repaved in areas where new pipe is installed.
- *Construction* - The earliest construction can begin is spring 2020 and is expected to last 12 months. Work typically starts downstream and moves upstream but is at discretion of contractor.
- *Compensation for easements* - City Staff will meet individually with property owners to discuss.
- *Bypass pumping* - The pump hoses are typically placed along the gutters and plated at driveway entrances.
- *Water and sewer* - The water and sewer mains will not be replaced with this project, but there may be service interruptions to residences.
- *Effects of project changes* - Tree removal, utility relocations, road and traffic impacts will be significantly reduced, but drainage capacity will increase slightly.

Investing in Infrastructure

Storm Water Services designs and constructs projects that make a difference in the lives of residents across the city. Our community benefits when stormwater quickly drains off roads, flood risks to homes are reduced and the health of local streams is protected or improved.
