## Storm Drainage Improvement Project

September 2017

### **Project Status**

Additional survey information is needed to complete the design plans for this project. Charlotte-Mecklenburg Storm Water Services has hired engineering consultant ESP Associates, P.A. and their sub-consultants, Taylor Wiseman & Taylor to perform the work.

Representatives may need to enter your property to collect additional survey data on the existing storm drainage system. While state law authorizes this access to private property, no buildings or structures will be entered or disturbed.

## Investing in Infrastructure

Storm Water Services designs and constructs projects that make a difference in the lives of residents across the city. Our community benefits when stormwater quickly drains off roads, flood risks to homes are reduced and the health of local streams is protected or improved.

The project goal is to reduce flooding of streets and structures throughout the neighborhood and address stream erosion to create a more natural, stable stream system.
