

June 2016

Project Status

After the prior project engineer left Dewberry Engineers, Brian Dey came in as project team engineer. The new team is making progress with the Lilly Mill design plans.

Next Steps

Dewberry Engineers is preparing the design plans for submittal. Once submitted, City staff and stakeholders will review the plans. Staff will apply for environmental permits in the next several months as the permitting process continues.

Lilly Mill Storm Drainage Improvement Project

Lilly Mill Storm Drainage Improvement Project

Engineering & Property Management
Storm Water Services Division
600 East Fourth Street
Charlotte, North Carolina 28202

Investing in Infrastructure

Charlotte has an aging public storm drainage system, much of which is past its useful life. The City repairs, replaces and installs new storm drainage infrastructure when it deteriorates or cannot handle increases in stormwater. Investing in infrastructure protects public safety, guards private property, improves water quality and enhances quality of life.

The Lilly Mill Storm Drainage Improvement Project goals are to reduce structure and street flooding throughout the neighborhood and stabilize streams.
