

Lincoln Heights

Storm Drainage Improvement Project

October 2019

Dear Resident,

Charlotte-Mecklenburg Storm Water Services will begin construction soon. On August 26, 2019, City Council awarded the construction contract to Nassiri Development, LLC. Construction is scheduled to start later this month and is estimated to take 18 months.

During the next few weeks these activities may be underway:

- Locating, flagging, marking and relocating utilities
- Trimming select trees to accommodate construction equipment

This kind of work uses heavy-duty construction vehicles including dump trucks, concrete trucks and excavators, all of which can be loud during operations. The contractor may keep equipment within the work area for the duration of the project. One of the goals of the construction planning process is to minimize disruptions and maintain local access and traffic flow. When it is necessary to detour traffic temporarily, signs will assist motorists. An inspector will be on site daily to address any questions or concerns.

Investing in Infrastructure

Storm Water Services designs and constructs projects that make a difference in the lives of residents across the city. Our community benefits when stormwater quickly drains off roads, flood risks to homes are reduced and the health of local streams is protected or improved.

The Lincoln Heights Project goal is to reduce street and structure flooding throughout the neighborhood.
