

Louise Avenue

storm drainage improvement project

your storm water fees at work

December 2012

Dear Resident:

Charlotte Mecklenburg Storm Water Services has been working with Duke Energy to complete the relocation of its utilities within the CSXT Railroad right-of-way. Duke Energy does not currently have access agreements to remove and relocate its utility poles. As a result, the bid phase for the Louise Avenue project has been placed on hold until Duke Energy resolves this issue.

For more information about this project, please visit our website at <http://stormwater.charmeck.org> and click on **Storm Water Projects** drop down menu in the green bar, then **Active Projects and Louise**.

If you have any questions, please contact Project Manager Danée McGee at dmcgee@charlottenc.gov or 704-336-4102.

Once this issue is resolved the bid phase will resume and the project will be advertised to contractors.

It is that time of year when a chill fills the air and snow begins to fall.

Sometimes, instead of snow, we get ICE. Next time the weather turns bad and your sidewalk is slick, spread sand to get a grip on that slippery walk.

If bad weather strikes the area causing limbs and brush to fall, residents are encouraged to prepare debris to normal collection guidelines (limbs no longer than 5 feet in length and no wider than 4 inches in diameter). The storm debris should be taken to curbside. Do not place debris in storm drains, gutters or on creek banks.
