

Louise Avenue

Storm Drainage Improvement Project

December 2017

Project Status

Charlotte-Mecklenburg Storm Water Services and La Bella Engineering have acquired all needed construction easements and addressed all utility design issues. The bid phase is underway. During this phase, the final plans will be circulated to qualified contractors for a competitive bidding process. By state law, the lowest responsible bidder is awarded the construction contract. The bid phase is expected to last three to four months before Council awards the project for construction. Once City Council awards the contract, construction will begin.

Investing in Infrastructure

Storm Water Services designs and constructs projects that make a difference in the lives of residents across the city. Our community benefits when stormwater quickly drains off roads, flood risks to homes are reduced and the health of local streams is protected or improved.

The Louise Avenue Project goals are to reduce street and structure flooding throughout the neighborhood and to address stream erosion.
