storm drainage improvement project

your storm water fees at work

May 1, 2015

Charlotte-Mecklenburg Storm Water Services and engineering consultant, US Infrastructure of Carolina, Inc., are in the final steps of the real estate phase and completing the construction plans.

The permitting phase has begun, during which the required water quality permits are obtained from Federal and State agencies. Future steps include the bid phase.

Waterways Need Plant Buffers

Buffers are trees, bushes, and deep rooted plants along a stream, pond, river or lake. They reduce property loss from erosion, support fish and wildlife, and improve water quality.

If my property is eroding, what can I do?

- Plant native bushes and trees!
- Leave grass unmowed.
- Keep herbicides away.
