

Construction Highlights

Work continues on the Lyon Court Storm Drainage Improvement project. Construction began in April 2019 and is estimated to take three years.

Beginning July 8, road closures will be necessary near the intersection of Morningside Drive and Commonwealth Avenue to install dual box culverts (8' x 8' and 8' x 6'). Morningside Drive between Ivey Drive and Commonwealth Avenue will be closed for approximately 10 weeks. Motorists should detour using Ivey Drive, Lorna Street and Commonwealth Avenue.

Beginning July 8, there will also be lane closures on The Plaza between Hamorton Place and Kensington Drive to install inlets and stormwater

pipe. This part of the project was expedited to coordinate with the Charlotte Department of Transportation bike lane installation to reduce overall construction impacts in this area.

The contractor will maintain access to the neighborhood, with temporary traffic signage directing motorists around the work zones. Construction signs will alert citizens, however, motorists should expect delays.

Sepi Engineering will be on site daily. Please contact Ryan Daughtrey at 704-287-1547 or Dave Tucker at 317-670-9477 to address construction-related issues and concerns that need attention.

Detour Coming Soon

Our goal is to minimize the impact of construction. The project designers have taken great care to develop a construction plan that will reduce inconveniences. However, the nature of this work may make it necessary to temporarily reduce or detour traffic flow and close streets. See detour map.
