Common concerns regarding construction

April 2018

## **OUR COMMITMENT TO YOU**

Our goal is to minimize the impact of any construction. The designers of this project have taken great care to develop a construction plan that will minimize inconveniences to you. However, the very nature of this work often makes it necessary to temporarily reduce or detour traffic flow and close streets.

## **HEAVY CONSTRUCTION EQUIPMENT**

This kind of work uses heavy construction vehicles, including dump trucks, concrete trucks and earth moving and trenching equipment, all of which are quite loud during operations. The contractor may keep equipment within the work area for the duration of the project.

## **OPEN HOLES AND TRENCHES**

If it is necessary to maintain an open hole or trench, the contractor is required to make the area safe. Please be cautious as you enter and exit your property.

Charlotte, North Carolina 28202

## Construction starting soon

Charlotte-Mecklenburg Storm Water Services is ready to begin construction. City Council awarded United Construction Company, Inc. the construction contract on April 9, with work to start in the next few months. Construction is estimated to take 12 months. Some common concerns regarding construction are listed on the other side of this postcard. Please take a few moments to read and understand the temporary disruptions associated with drainage repair projects.
