

Queens

Storm Drainage Improvement Project

Survey crew coming soon

Project Status

June 2020

Several other storm drainage improvement projects are underway in the surrounding area. With the Queens Storm Drainage Improvement Project, Charlotte-Mecklenburg Storm Water Services is working with Woolpert to evaluate the storm drainage system in the Queens Road area. Representatives may need to enter your property to collect survey data on the existing system. While state law authorizes access to private property, no building or structure will be entered or disturbed. The survey work is scheduled to begin in July and take about a month to complete.
