

Sunnyvale

storm drainage improvement project

YOUR STORM WATER FEES AT WORK

June 4, 2013

Dear Resident,

Charlotte-Mecklenburg Storm Water Services held its second public meeting on May 8 at St. Sarkis Armenian Apostolic Church for the Sunnyvale Storm Drainage Improvement Project. The goal of this project is to reduce flooding of streets and structures, as well as reduce erosion along the stream and channel.

The meeting presented general project information on Capital Improvement Projects and discussed existing storm water issues within the project area. Meeting highlights:

- Project Manager Jackie Bray welcomed the attendees, introduced the project team and gave a summary.
- Chris Fleck, Project Manager for our design consultant Dewberry, described the results of the existing conditions analysis and the plan for the proposed improvements.
- Mr. Fleck discussed how the project area will be broken

up into smaller projects for the design phase. Lilly Mill is the first phase and the design began in March 2013. Chandworth is the second phase and will begin in 2013/2014.

- A question/answer session was held.

If you were unable to attend the public meeting or were unaware that one was being held, the material from the entire presentation and detailed meeting minutes are available on our website at <http://stormwater.charmeck.org>. Click on **Storm Water Projects** dropdown menu in the green bar, then **Active Projects** and **Sunnyvale**.

If you have any questions about this project, please contact Project Manager Jackie Bray at jbray@charlottenc.gov or 704-336-6770.
