

Wanamassa

Storm Drainage Improvement Project

February 2018

Project Status

Charlotte-Mecklenburg Storm Water Services and engineering consultant Armstrong Glen are finalizing the construction plans. Staff continues to work with property owners and regulatory agencies to acquire easements and permits needed for construction.

Next Steps

Next is the bid phase, during which final plans are circulated to qualified contractors for competitive bidding, with the lowest responsible bidder awarded the construction contract. The bid phase typically lasts seven to eight months, with construction to begin afterward.

Investing in Infrastructure

Storm Water Services designs and constructs projects that make a difference in the lives of residents across the city. Our community benefits when stormwater quickly drains off roads, flood risks to homes are reduced and the health of local streams is protected or improved.

The Wanamassa project goal is to reduce street and structure flooding throughout the neighborhood.
