

# UNDERSTANDING Your Storm Water Fee

The Storm Water Fee is based on a property's impervious surface area such as rooftops, concrete driveways and walkways. The more impervious surfaces, the more storm water runoff flows from the property into the storm drainage system.

Our community benefits when stormwater quickly drains off streets, flood risks are reduced, and local streams are improved and protected.

Effective July 1, 2017, the bill processing fee increased 10 cents per bill.

Did you know if you maintain a stormwater control measure or have a pond on your property you may be eligible for a fee credit?
