

TURN AROUND, DON'T DROWN!

Mecklenburg County is very prone to flash flooding, which can endanger travelers, damage property, and even cost lives. Just six inches of rushing water can knock an adult down, and as little as one to two feet of fast moving water can carry a car away, whether it's 4-wheel drive or not. Avoid traveling when there is flooding, and if you see flooding (or barricades), remember to Turn Around—Don't Drown. It's not worth it!

KEEP OUR LAKES LOVELY

Going to the lake this summer? Charlotte-Mecklenburg Storm Water Services works year round to keep lake water safe by monitoring bacteria levels, investigating pollution, enforcing lake buffers, and surveying for aquatic vegetation.

You can help! Always be sure to:

- 1) Properly dispose of trash**
- 2) Prevent leaks and spills**
- 3) Regularly clean your boat & trailer to remove aquatic “hitchhikers”**
- 4) Report pollution by calling 3-1-1**
