

HELP US DECREASE THE GREASE

Grease from the food service industry can harm our streams and lakes if it ends up in storm drains. So, if you see this type of pollution behind a restaurant or business, call 311 or use our Water Watchers App to report it and keep our waterways clean!

Learn more at StormWater.CharMeck.org

Grease and pollution that end up in storm drains flow to streams and lakes. Only water belongs in storm drains.

YOU'RE PROBABLY STANDING ON TOP OF SOME OF OUR BEST WORK

Storm Water Services is constantly maintaining and improving our community's storm drainage infrastructure to reduce flood risks and protect the traveling public.

CHARLOTTE HAS MORE THAN:

150,000
storm drains

3,500 miles
of stormwater pipes

2,000 miles
of open drainage
ditches and streams

If laid end-to-end, our community's stormwater pipes would reach from Charlotte to LA
