

# VISION ZERO

## SAFER STREETS FOR CHARLOTTE

### Charlotte's Commitment to Vision Zero

- Vision Zero is a collaborative, data-driven initiative to eliminate traffic-related deaths and severe injuries.
- The City Council adopted Transportation Action Plan includes an objective to implement a Vision Zero initiative.
- The City is developing a Vision Zero Action Plan that will guide the City's efforts to reduce traffic fatalities and severe injury crashes to zero by 2030.

### By the numbers, a look at 2017 crash data

**73 crashes** occur per day on our streets. That's more than **26,000 crashes** per year.

**71 crashes**, resulted in **74 fatalities** on our streets in 2017. This is the 3rd consecutive increase in annual fatalities.

**27 pedestrians were killed** on Charlotte streets in 2017.

People walking and bicycling are involved in less than **3% of all crashes** but account for nearly **44% of all traffic deaths**.

**In Charlotte, people walking and bicycling are disproportionately impacted among traffic deaths compared to total crashes and mode share.**
