Storm Drainage  
Improvement Project

**PROJECT STATUS**  
OCTOBER 2024  
Planning continues.

## PROJECT STATUS | OCTOBER 2024

Charlotte-Mecklenburg Storm Water Services is working with LandDesign, Geoscience Group, and CES Group Engineers to evaluate a culvert and the storm drainage system in this area.

Representatives may need to enter your property to perform utility soft digs, geotechnical borings, and to collect data on the existing system. While state law authorizes access to private property, no building or structure will be entered.

The work is scheduled to begin in October and take about 2 months to complete.
